

Titosy Manankasina

Fullstack JavaScript / Flutter Developer

Antananarivo, Madagascar | +261 38 80 322 74 | dev.titosy@gmail.com | titosy.dev | linkedin.com/in/titosy-manankasina | github.com/titoo-dev

PROFILE

Fullstack JavaScript / Flutter developer with more than 4 years of experience designing and shipping web and mobile applications (React, Next.js, Node.js, Flutter). I work at every stage of a project, from requirements analysis to production, with hands-on DevOps practice (Kubernetes, Terraform, Argo CD) and agentic AI solutions. I help clients scope their projects to offer tailored, simple and effective solutions.

TECHNICAL SKILLS

Programming languages: JavaScript, TypeScript, Dart, Kotlin, C++, SQL
Frontend: Next.js, React, TypeScript, Tailwind CSS, ExtJS
Backend: Node.js, Nest.js, Express, GraphQL, PostgreSQL, Prisma, TypeORM
Mobile: Flutter, Dart, Kotlin, Firebase
DevOps: Terraform, Kubernetes, Argo CD, GitHub Actions, Prometheus, Grafana, Docker
AI & Tools: Mastra AI, Convex, Inngest, Claude Code, LangGraph, Langchain, Figma
Methods: Scrum, Micro-frontends, Monorepo (Turborepo), GitOps, Code review

PROFESSIONAL EXPERIENCE

Experienced JavaScript / Flutter / Kotlin Developer Oct. 2025 to present

Fluentech, Antananarivo, Madagascar (hybrid)

Designing and building WASIA SUP' (wasiasup.com), an all-in-one SaaS platform supporting businesses in Mayotte: project management, funding requests, invoicing, automated business plan creation, financial forecasting and statements, all driven by an agentic AI copilot.

- Built an agentic AI copilot with Mastra AI (memory and RAG on Convex): navigation, one-click creation, pre-filled forms, tools filtered by role and gated behind a confirmation.
- Generated the forecast business plan (P&L, intermediate balances, working capital, cash flow, balance sheet) from a guided questionnaire, with PDF export.
- Set up a micro-frontend architecture with Next.js Multi-Zones in a layered Turborepo monorepo (domain, services, data access).
- Set up asynchronous workflows with Inngest.
- Run the full workflow, from development to delivery, with GitOps (GitHub Actions, Terraform, Kubernetes, Argo CD) and Prometheus and Grafana monitoring.

Environment: Next.js Multi-Zones, Turborepo, Mastra AI, Convex, Inngest, Prisma, PostgreSQL, Terraform, Kubernetes, Argo CD, Prometheus, Grafana, Flutter, Kotlin

Fullstack JavaScript Developer Jul. 2025 to Oct. 2025

PUSH-IT, Antananarivo, Madagascar (hybrid)

Development of a software license management application.

- Integrated Cryptolens to manage and secure licenses.
- Set up software update management with Mender.io.
- Integrated billing and payments through Zoho Book.
- Developed the frontend with Next.js.
- Designed the backend with Express, PostgreSQL, TypeORM and GraphQL.
- Organized the project as a monorepo to ease maintenance and collaboration.

Environment: Next.js, Express, PostgreSQL, TypeORM, GraphQL, Mender.io, Zoho Book, Cryptolens, Monorepo

JavaScript Developer

Jul. 2022 to Jul. 2025

Bocasay, Antananarivo, Madagascar (hybrid)

Contributed to the development and maintenance of a regulatory compliance application for chemicals, cosmetics, biocides and medical devices. Worked with cross-functional teams to ensure quality, performance and fast delivery.

- Developed and maintained user interfaces with React and ExtJS.
- Connected front-end features to server data through GraphQL.
- Took part in daily meetings and sprint planning to stay aligned with the project goals.

Environment: React, ExtJS, GraphQL, Scrum

JavaScript & Flutter Developer Intern

Mar. 2022 to Jul. 2022

Flit Soft, Antananarivo, Madagascar (remote)

Member of a team in charge of integrations and developer tooling. Main mission: improve and simplify the developer experience by optimizing tools and processes, keeping them accessible and meeting the specific needs of technical teams.

- Integrated Mvola payments into a car-sharing and taxi-driver app.
- Built a code generator in Dart to speed up development.
- Took an active part in regular meetings and presented proposals across the company.

Environment: JavaScript, Flutter, Dart, Mvola

PROJECTS

Predict, predictive.titosy.dev

2026

French / English predictive typing, 100% offline: completion, next word, autocorrect, grammatical agreement and emoji, in every application.

Technologies: C++17, Windows TSF, Direct2D, fcitx5, n-gram (Kneser-Ney), Inno Setup, Next.js

WASIA SUP', wasiasup.com

2026

All-in-one business support platform for Mayotte: projects, funding, invoicing, business plans, driven by an agentic AI copilot.

Technologies: Next.js 16, React 19, TypeScript, Mastra AI, Convex, Inngest, Prisma, PostgreSQL, Better Auth, Turborepo, Kubernetes, Argo CD

Okani Survey, okani-survey.vercel.app

2025

Government survey platform (Gabon) assessing the public land service. Web + cross-platform app.

Technologies: Next.js, TypeScript, Cross-platform, Tailwind CSS, Mobile

Chantastik, chantastik.titosy.dev

2024

Creates animated lyric videos from an audio file, with precise syncing and LRC file export.

Technologies: Remotion, Web Audio API, React, TypeScript, LRC

MID

2023 - 2024

Web and mobile interfaces for a currency buy and sell order management app (freelance): order entry, validation and tracking by user profile, real-time push notifications, integration with a Laravel backend's APIs.

Technologies: Flutter, Dart, Firebase Cloud Messaging, Laravel (API)

EDUCATION

Bachelor's degree in Software Engineering

Oct. 2018 to Oct. 2022

Institut Supérieur Polytechnique de Madagascar (ISPM), Antananarivo, Madagascar

LANGUAGES

French: full professional proficiency | English: limited working proficiency
